

Security Solutions Project Manager

Fibertel Communications Canada Inc. (Fibertel) is looking for a Security Solutions Project Manager to join our team. The Project Manager plans, schedules, organizes and directs application engineering, material and equipment procurement, field installation and start-up of assigned projects. Your expertise will help us drive innovation and continuous improvement for a better overall customer experience while supporting our team members.

Reporting to the Vice-President of Construction, this position is accountable for end-to-end project delivery within a highly collaborative and capable group of team members. In this role, you will:

- Be responsible for managing the installation, commissioning, and verification of Security Systems as per the project plan and contract.
- Be responsible for organizing schedules and managing financial aspects and resources to oversee effective project execution while working with technicians, coordinators, technical managers, and clients.
- Oversee project execution and ensure it meets the established requirements (e.g., budget, timeline, functionality, client satisfaction).
- Lead technical specialists, coordinators, subcontractors and suppliers to orchestrate project execution with maximum quality and efficiency.
- Communicate project progress and ensure quick decision-making.
- Negotiate change orders and ensure that they are executed in accordance with the terms and conditions of the contract.
- Ensure that health and safety measures are rigorously implemented on the project site and follow our “Safety-First” culture.
- Bring a “client satisfaction” mentality to the project team and facilitate good interactions with the client and/or end-user to build a relationship that will result in a high net retention rate.

As a leader within the PMO, you will bring thought leadership and best practices to the team to help us continually improve - helping us expand our knowledge in project management and innovative ideas to improve our customer and field experiences.

What you will need to succeed.

- Have a passion for learning and development.
- Thrive in a fast-paced and changing environment.
- Are forward-thinking and willing to try new ideas.
- Driven to learn new skills.

Qualifications

- Solid track record of managing medium to large enterprise-scale projects with multiple stakeholder groups. Experienced dealing with ambiguous requirements and translating them into concrete project outcomes.
- Demonstrate leadership, problem-solving, negotiation, superb communication and analytical skills while translating complex technical topics into easily understood concepts for our stakeholders and team members.
- Experience working on projects in the network/infrastructure security domain as a Project Manager. With fluent understanding of the technical aspects of integrated security solutions.
- Experience with field operations and process management
- Previous experience as an installer and/or design engineer considered an asset.
- Highly motivated, creative, and self-sufficient with the ability to work successfully under pressure.
- Ability to manage multiple priorities in the allocated time and meet deadlines.
- Stakeholder management experience, including senior executives, is an asset.

Recommended Skills & Experience

- Bachelor's degree in business, Computer Science, Engineering, or equivalent education and/or experience.
- Minimum of 5 to 7 years project management experience in the Security Systems industry.
- Project Management Institute (PMI) certification preferred.
- Industry-specific certificates and/or licenses a plus.
- Fluent in Microsoft programs, specifically Microsoft project.
- Fluent in English, spoken and written.
- Flexible, independent, and skilled communicator.
- Leadership and strong client service skills.

Additional Details

- Location for this role: Edmonton, AB
- Travel within Alberta may be required.
- Full-Time Position

What can you expect from us?

- Supportive and collaborative teamwork-based culture.
- Passionate and focused environment open to new ideas and thoughts.
